Backend Engineer | Node.js | TypeScript | PostgreSQL | Redis

SUMMARY

Backend engineer focused on Node.js, TypeScript, and PostgreSQL — REST API design, concurrency-safe data modeling, and authentication systems for production-oriented platforms. Currently building IMS, an incident management system with RBAC and Redis-backed background jobs.

SKILLS

Languages	JavaScript, TypeScript, C/C++
Backend	Node.js, Express.js, NestJS, REST API Design
Databases	PostgreSQL, Redis, Prisma
Security	JWT, RBAC, HttpOnly Cookies, Zod
Testing	Jest, SuperTest, k6
Infrastructure	Docker, AWS (EC2, RDS, S3, ECR), Git, GitHub, CI/CD
Observability	Pino, Sentry

EXPERIENCE

Independent Software Developer

08/2025 – Present

Self-employed

Remote

- Designing and building backend systems end-to-end across three projects (Kridha, ShelfAPI, IMS) — REST API design, PostgreSQL data modeling, authentication, testing (Jest, SuperTest, k6), and AWS/Docker deployment, with Pino and Sentry for observability.

Capex Buyer

11/2024 – 06/2025

Vedanta Aluminium Limited

- Owned capital equipment procurement decisions and vendor negotiations, coordinating across engineering, finance, and operations stakeholders in a large-scale industrial environment.

PROJECTS

Kridha — B2B/B2C Marketplace Platform

[kridha-marketplace.vercel.app](#) | github.com/DevWithAbhishek/kridha

Node.js · Express · TypeScript · PostgreSQL · Redis · Docker

- Architected and built a marketplace platform end-to-end: 61 REST API endpoints across 22 PostgreSQL data models, with modular Node.js/Express/TypeScript service layers and Redis caching.
- Designed transactional, concurrency-safe operations for order and inventory flows; identified and fixed a data-race condition under concurrent load via k6 testing.
- Implemented JWT authentication with refresh token rotation and HttpOnly cookies; integrated a payment gateway with webhook verification and idempotent, retry-safe reconciliation.
- Tested with Jest/SuperTest and k6 (p90/p95/p99 latency benchmarks); containerized with Docker, deployed via CI/CD.

IMS — Incident Management System *(In Development)*

Express · PostgreSQL · Redis · BullMQ · Docker

- Designing and building an incident management system with JWT authentication and RBAC for multi-role team workflows.
- Implementing incident lifecycle tracking, SLA policies, and escalation workflows, with BullMQ-backed background job processing on Redis.
- Building toward CI/CD pipelines and unit/integration test coverage as core development practices.

ShelfAPI — Document Vault REST API

github.com/shelfapi

NestJS · PostgreSQL · Docker · AWS

- Built a NestJS REST API with JWT authentication, ownership-scoped CRUD, and PostgreSQL data modeling via Prisma.
- Implemented direct-to-S3 file uploads via pre-signed URLs, keeping the API off the file-transfer path; deployed to AWS EC2 behind Nginx, RDS PostgreSQL in a private subnet, least-privilege IAM roles, and ECR-versioned, rollback-capable Docker images.

EDUCATION

B.Tech, Mechanical Engineering

2020 – 2024

Motilal Nehru National Institute of Technology Allahabad (NIT Allahabad)

CPI: 8.59
